PROFILE

Proactive and dynamic software developer with 18 years of experience, strong leadership, and proven problem-solving skills. Recognised for delivering high-quality, user-centric solutions through collaboration and adherence to best practices like SOLID. Passionate about coding and continuous learning, with a focus on innovation, modern frameworks, and empowering teams to achieve excellence.

EXPERIENCE

Senior Front End Developer at *LATAM Airlines*

Mar 2024 - Present

Worked for the largest airline group in Latin America and one of the most significant worldwide as part of an agile team, enhancing LATAM's ancillary products store and frequent flyer miles purchase platform, with a focus on improving user experience and increasing sales conversion.

Key responsibilities & achievements:

- Developed and maintained flight, fare and seat selection workflows, ensuring optimal performance and scalability across LATAM's e-commerce platforms.
- Designed and executed experiments in production using ABSmartly, improving purchase conversion and driving business decisions.
- Supported technical leadership by mentoring peers, contributing to code reviews, and enhancing team workflows through automation of internal processes and reporting.

Senior Software Engineer at *Globant*

Feb 2021 - Feb 2024

Developed scalable web applications for high-profile clients using modern frontend frameworks and Agile practices at Globant, one of the largest technology consulting firms in Latin America.

Key responsibilities & achievements:

- Designed and implemented responsive web solutions using the Svelte framework.
- Delivered performance-focused UI components, reducing load times and improving UX.
- Developed sales and ancillary services modules in a microservices architecture, using React.js, Next.js, Jest, React Testing Library, Storybook and WebdriverIO (E2E testing).
- Focused on building robust, testable, and reusable components for LATAM's customer-facing platforms.
- Contributed to continuous delivery pipelines and improved test coverage across key journeys.

Software Development Manager at *Amicar S.A.*

Apr 2019 - Dec 2020

Led the digital transformation process at Amicar, overseeing the integration of frontend, backend, and Salesforce teams using Agile (Scrum) methodology.

Key Responsibilities & Achievements

- Directed the synchronisation between Salesforce, frontend, and backend development teams.
- Designed and implemented highly scalable cloud architecture on Google Cloud Platform, aligned with business growth and reliability needs.
- Measured and optimised cloud infrastructure costs, contributing to strategic decisions on scalability and budget.

- Drove alignment between business stakeholders and technical teams during the platform's transition to a fully digital sales process.

Co-Founder & CTO at *Mink Startup*

Sep 2018 - Dec 2020

Co-founded and led the technical strategy of Mink, a proptech startup focused on real estate investment solutions. Created and developed the Webi investment platform as a full-stack developer.

Key Responsibilities & Achievements:

- Developed the "Webi" real estate investment platform.
- Represented the startup in the Start-Up Chile G19 acceleration programme.

Developer Analyst and Technical Leader at *Indexa S.A.*

Mar 2007 - Dec 2017

Led the development and technical direction of Indexa's automotive loan platform, collaborating with major banking institutions including Scotiabank, Bice Bank, and Amicar financing company.

Key Responsibilities & Achievements:

- Acted as Technical Lead of the platform development team, guiding architectural decisions and mentoring junior developers.
- Designed, developed, and maintained the automotive credit management system, streamlining loan processing for multiple financial institutions..
