PROFILE

Senior Frontend Engineer (18 years) building high-traffic e-commerce on LATAM.com (~10M monthly users). Recent A/B experiment lifted premium-cabin ticket purchases by +42.78% (n=146K). Deep in React, Next.js and TypeScript, with a strong bias for experimentation, performance and design systems. Former Development Manager and startup CTO — comfortable as a senior IC who also mentors engineers to promotion and aligns tech with business outcomes.

EXPERIENCE

Senior Front End Developer at *LATAM Airlines Group*

Mar 2024 - Present

Part of the agile squad enhancing LATAM's ancillary products store, premium cabin sales and frequent-flyer miles platform on LATAM.com (~330K daily / 10M monthly users) — the largest airline group in Latin America.

- Developed and maintained fare-family and seat-selection workflows across LATAM's e-commerce platforms, ensuring performance and reliability under peak-season traffic.
- Designed and shipped a Premium Economy full-on experiment on ABSmartly that lifted premium-cabin ticket purchases by +42.78% (n=146K, 12 weeks, 95% CI +10.9% to +62.3%) — variant rolled out to production.
- Raised test coverage from 82% to 97% on fare-selection and seat-selection critical artefacts (web + BFF), reducing regressions on the checkout's highest-traffic flows.
- Recognised as LATAM Service Leader 2025 for cross-team contribution.

Senior Software Engineer at *Globant*

Feb 2021 - Feb 2024

Developed scalable web applications for high-profile clients using modern frontend frameworks and Agile practices at Globant, one of the largest technology consulting firms in Latin America.

- Built customer-facing modules of LATAM's booking platform (React, Next.js, Node.js) in a micro-services architecture serving millions of daily users.
- Delivered performance-focused UI components in Svelte and React, reducing load times and improving UX on key conversion flows.
- Mentored 3 semi-senior engineers over 8 months — 2 promoted to Senior — through pair-programming, code reviews and career-development guidance.
- Awarded "Constantly Innovate" 2022 — company-wide peer-voted recognition for consistent innovation across the organisation.

Software Development Manager at *Amicar S.A.*

Apr 2019 - Dec 2020

Led the digital transformation process at Amicar, overseeing the integration of frontend, backend, and Salesforce teams using Agile (Scrum) methodology.

- Led a 10-person cross-functional team (frontend, backend, Salesforce) through Amicar's digital transformation, delivering the full digital-sales platform in 12 months.
- Rebuilt the credit-calculation engine API from the ground up, cutting the delivery time of a loan's financial data from 8s to under 800ms — a 10× performance gain.

- Architected and led the platform migration from ASP 2.0 / COM+ / SQL Server to React.js / PostgreSQL / MongoDB, improving overall performance by 45% and enabling native integrations with Salesforce and 6 financial institutions.

Co-Founder & CTO at *Mink Startup* (in parallel with Amicar)
Sep 2018 - Dec 2020

Proptech startup for real-estate investment. Built "Webi" full-stack (React, Node.js, GCP) and represented Mink in Start-Up Chile G19 acceleration programme.

Junior Developer → Technical Lead at Indexa S.A.
Mar 2007 - Dec 2017

Progressed from Junior Developer to Technical Lead over 10 years, ultimately leading a 5-engineer team owning Indexa's automotive credit platform.

- Optimised the automotive credit-calculation engine, reducing response times by 50% across all downstream integrations.
- Built the platform's first design system, standardising UI components and accelerating delivery across new client integrations.
- Acted as primary technical point of contact for 5 enterprise clients – Scotiabank, BICE Crediautos, Tanner, Amicar Chile and Amicar Perú – aligning delivery with each client's SLAs and integration requirements.

EDUCATION

IELTS Preparation Course	New Zealand Language Centre	New Zealand	2025
Diploma in Lean Service	Adolfo Ibáñez University	Chile	2016
Programmer Analyst	DUOC UC	Chile	2011 - 2013
Programming Technician	Science and Technology HS	Chile	1998 - 2001

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), C# (.NET), Python, PHP
Frontend:	React, Next.js, Vue, Svelte, HTML5, CSS3, Styled Components, Material UI, Tailwind CSS
Backend/APIs:	Node.js, REST, GraphQL, .NET, Express
Testing:	Jest, React Testing Library, WebdriverIO, SonarQube
Databases:	PostgreSQL, MongoDB, MySQL, Microsoft SQL
Cloud & DevOps:	Google Cloud Platform, AWS, Terraform, Docker, CircleCI, GitHub Actions, Jenkins
Practices:	Accessibility (WCAG / A11y), i18n, AI-augmented development workflows, Core Web Vitals, A/B Testing (ABSmarty), Feature Flags, Design Systems, Micro-frontends, CI/CD, SOLID, Agile / Scrum / Kanban
AI-assisted:	Claude Code, Cursor, Codex, GitHub Copilot
Tools:	Git, GitHub, GitLab, Bitbucket, Jira, Confluence, Grafana, Figma, LookerStudio, Slack API, Sendgrid, Swagger, Storybook

AWARDS

LATAM Service Leader (LATAM, 2025) – Company-wide recognition for cross-team contribution aligned with LATAM's J.E.T.S. values.

Constantly Innovate (Globant, 2022) – Annual peer-voted award for consistent innovation across the company.
